

JOURNAL OF INSECT BEHAVIOR—Volume 10, 1997

Journal of Insect Behavior is an international forum for the publication of peer-reviewed original research papers and critical reviews on all aspects of the behavior of insects and other terrestrial arthropods, including (but not limited to): motor patterns and orientation; quantitative ethology; social behavior; behavioral ecology; neurophysiology; of behavioral responses; pharmacological probes into behavior; genetic and developmental determinants; and theoretical, mathematical, and computer models of behavioral systems. *Journal of Insect Behavior* also publishes Short Communications, which are either brief theoretical or empirical papers on insect behavior or constructive critiques of recent-published papers in this field, especially those in response to papers published in the journal. Thus, *Journal of Insect Behavior* is a forum not only for original research findings, but also for the free exchange of ideas and views based on those findings.
